

Alain SIMONIN (alain.simonin@cea.fr) received his PhD in physics from Paris XI university (France) in 1992 after three years working on the “Large Electron Positron collider” (LEP) at CERN (Geneva). He is presently Researcher and the CEA senior expert in the field of Neutral Beam Injection (NBI) systems for fusion. He has been performing and leading several NBI experiments at CEA, and in parallel, he coordinates this research activity in French academic laboratories in the framework of the “Fédération de Recherche sur la Fusion par Confinement Magnétique” (FRFCM) and in Europe in the framework Eurofusion Power Plant Physics&Technology (3PT) “ Neutral beam -Advanced technologies”. He has co-authored 50 publications in peer-reviewed journals.
